

## Glazed Thin Brick

The color choices are endless with our Glazed Thin Brick! Whether you're seeking a Retro look, something Ultra-Modern, or anything in between, our ceramic-glazed thin brick will give you a hard, cleanable surface combined with the strength and utility of our thin brick.

## Large Format Sandmolds

We now offer the beautiful, soft textures of our Sandmold Series in larger sizes for both full-depth brick and Thin Brick. The 12-inch lengths of the Utility and Norman sizes extend the design possibilities, and may be better suited for larger buildings.

Norman Sandmolds are similar in appearance to ancient brick found across Europe.

Both Norman and Utility Sandmolds benefit from faster, more efficient installation derived from their larger sizes.

## BrickFast™ Type McN

The BrickFast™ Type McN panel system is an innovative way to quickly, accurately, and securely install Thin Brick veneers. The system incorporates a true mechanical attachment between each field brick and the galvanized metal panel, and does not rely on adhesives for its long-term strength and durability.

## Thin Brick, Face Brick

McNear Brick & Block's roots go back to 1868, making us one of the country's oldest brick manufacturers. We produce a broad selection of Face Brick, Thin Brick, and Brick Pavers in colors and textures ranging from the soft, handmade look of our Sandmold Series, to the "reclaimed" aesthetic of our Old California Series, to the vibrant, sharp colors and edges of our Commercial Series. In addition to the products shown within these pages, we have the capability of manufacturing custom blends, shapes, and colors. All the colors depicted herein are available as Face Brick, Thin Brick, and as Brick Pavers. McNear brick products meet the standards of ASTM C216 Grade SW and ASTM C1088 Grade Exterior, and are suitable for use in freeze/thaw environments.

McNear Clay Brick are manufactured with  
30-100% Post-consumer, Recycled Content.

## Thin Brick

McNear Brick & Block recognizes that Thin Brick is an important and growing sector of brick construction, and we offer many shapes and sizes of Thin Brick to be used either independently, or in conjunction with matching full-depth brickwork.

This newest generation of brick products has much to offer:

- No expensive footings or supports required
- Faster construction times
- Easier to insulate
- Thinner walls, creating more usable space
- New avenues for brick use (ie: ceilings)
- No seismic concerns
- Do-it-yourselfer friendly
- Great for remodels
- Applicable to any surface, interior or exterior
- Easier and cheaper shipping and handling
- Much lower embodied environmental costs
- Works with Panelization and Precast construction.

Thin Brick gives these benefits without sacrificing any of the durability, low maintenance, beauty, and value of traditional brick construction.

## SANDMOLD SERIES

Capture the look and feel of a Manhattan Loft, Tuscan Farmhouse, or a Colonial Inn with these exquisitely hand-crafted bricks. Their softened edges and subtle irregularities truly replicate authentic antique bricks.

## BrickFast™ Type McN Panel System

BrickFast™ Type McN panels stand out from other thin brick attachment methods, as an extremely fast, simple, and secure system. The 4' by 4' BrickFast Type McN galvanized steel panels have tabs that engage matching slots cut into the backs of the bricks, creating a strong mechanical bond. While adhesive is used during installation, the long-term strength of this system comes from the mechanical attachment of the bricks to the panels.

BrickFast Type McN is used in the same way as other cladding systems, with similar methods of moisture control and insulation. It can be installed directly over weather resistive barriers, drainage planes, rigid foam insulation, insulated concrete forms, structural insulated panels, or a combination of these substrates.

- BrickFast Type McN is suitable for both new construction and remodels. It can be used on both interiors and exteriors.
- BrickFast Type McN can incorporate special shapes, such as Sills and thicker bricks for Quoins, etc.
- BrickFast Type McN panels are available for a variety of brick sizes, including: Modular (2-1/4 x 7-5/8 x 5/8), Norman (2-1/4 x 11-5/8 x 5/8), Utility (3-5/8 x 11-5/8 x 5/8), King (2-5/8 x 9-5/8 x 5/8), and Standard (2-7/16 x 8-1/8 x 5/8).
- Special BrickFast Corner panels are used, which wrap around the corners.
- BrickFast Type McN panels are made from 28-gauge, galvanized (G60) steel. Other materials (ie: 26-gauge G90) are available as special order.
- BrickFast Panels meet or exceed the standards of ASTM A653 and E330.

## Glazed Thin Brick

We fire ceramic glazes over our Thin Brick to create a product line that blends the beauty of ceramic tile with the strength and utility of brick.

**Applications:** Glazed Thin Brick have a hard, durable, and cleanable surface, which makes them perfect for entryways, restaurants, kitchens, and bathrooms. They can also be used as colored accents on ordinary brick walls, framing windows and doorways, or as bands or quoins. Glazed Thin Brick create a richly pigmented, durable, low-maintenance, graffiti-resistant surface.

**Sizes and Shapes:** McNear Glazed Thin Brick can be ordered in all our Thin Brick sizes and shapes, including Corners and Caps (See pages 21-22).

**Colors:** While starting with a standard palette of colors, we have the ability to produce or match virtually any color.

**Texture:** Our Glazed Thin Brick are created from actual clay brick, and they incorporate the subtle marks and textures that are clay brick's hallmark. Glazed Thin Brick are typically produced on flat, square-edged bricks, but we also have the ability to glaze our distinctive Sandmold textures.

## Large Format Sandmolds

McNear Sandmolds are now available in Utility (11-5/8" x 3-5/8") and Norman (11-5/8" x 2-1/4") sizes, both in Full-Depth brick and in Thin Brick.

Bringing the historic, hand-made texture to larger bricks can be particularly useful for projects where the scale would benefit from larger bricks, but where a traditional character is still desired.

Norman Sandmolds are similar in appearance to ancient brick found across Europe.

Both Norman and Utility Sandmolds benefit from faster, more efficient installation derived from their larger sizes.
