CELEBRATING

THE SPACES IN BETWEEN.

While our gorgeous Cultured Stone veneers tend to be the center of attention, it's often the grouting styles in between that can really make a difference. Creating the right mortar joint for a project is a matter of choosing not only the perfect color, but also the right width—a choice that naturally affects the total square footage. And while a standard mortar joint is typically 1/2" in width, some stone textures allow for a dry stacked, tight-fitted joint to achieve a clean, tailored appearance.
