

## Hideaway retreat

Longing for that far-away feeling? With a little clever creativity, you can conjure up a postcard-perfect parallel right in your own backyard. Start from the ground up, with our sand-textured Ocean slabs — then amp up the ambiance with lounge-worthy furniture and linens, rope decor and an outdoor shower with climbing vines.

## Layer your landscape

---

Working with a large piece of flat land? Layering your landscape with pavilions or areas with different heights allows you to create intimate areas in your outdoor space. This will create focus around your favorite features such as waterfalls and flower beds or help other features such as hot tubs blend in. It's a dynamic way to keep the eye moving fluidly while telling a singularly chic story.

## Define your spaces outdoors

---

When it comes to creating rooms outdoors, definition and separation will allow you to showcase your spaces. Infuse function and beauty through contrasting colors, textures and mosaic patterns at ground level that will create separation between dining and lounging. Break up your space even further with a lower firepit area and privacy wall for the ultimate late-night leisure that will convert a standard space into a warm welcome.

## Take a walk ————— on the styled side

From path to pool to firepit, walkways guide us through the design story and lead us right to where we want to go: your property's most inviting spaces. And while simple and straightforward can sometimes be sublime, our creative collection of unique textures, finishes, colors and shapes may inspire you to step to a different beat and wander off in a stunning new style direction.

## Custom designs that really stack up

Outdoor spaces you love to live in go well beyond basic these days. Our cleverly coordinated collections come together to create statement-making designs that are truly one-of-a-kind. From custom furniture to al-fresco kitchens, fire features, bars and beyond, we make it possible to create outdoor areas that are everything but cookie-cutter. You'll never have to coax your guests to take the party outside again.

## The luxury of low maintenance

Outdoor spaces are made to be enjoyed. Spend less time caring for them and more time admiring them by incorporating hardscaping elements that help keep maintenance to a minimum. Make high quality stones your highlight and let low-care greenery play a supporting role: It's a perfectly pleasing way to minimize mowing and mulching and maximize your me-time.

## Beyond beige

When it comes to continuity, beige can be beautiful. But don't be afraid to step beyond: you can exercise your off-white options by injecting shots of color, texture and scale into that dreamy cream landscape. It's a playful way to add interest, without drawing too far outside the lines.

The Design Pillars

# Color — More than just shades of grey

Play with our palette of coordinating and contrasting hues to inject visual interest and create a customized look that's right on tone.

Carefully deconstructed color play is pure delight for the eye. Create a subtle sense of continuity by experimenting with light and dark shades from the same palette.

# Texture — When it comes to striking spaces, finish first

Creative textures trick the eye and add a winning touch to every outdoor space, leading us in bold new directions.

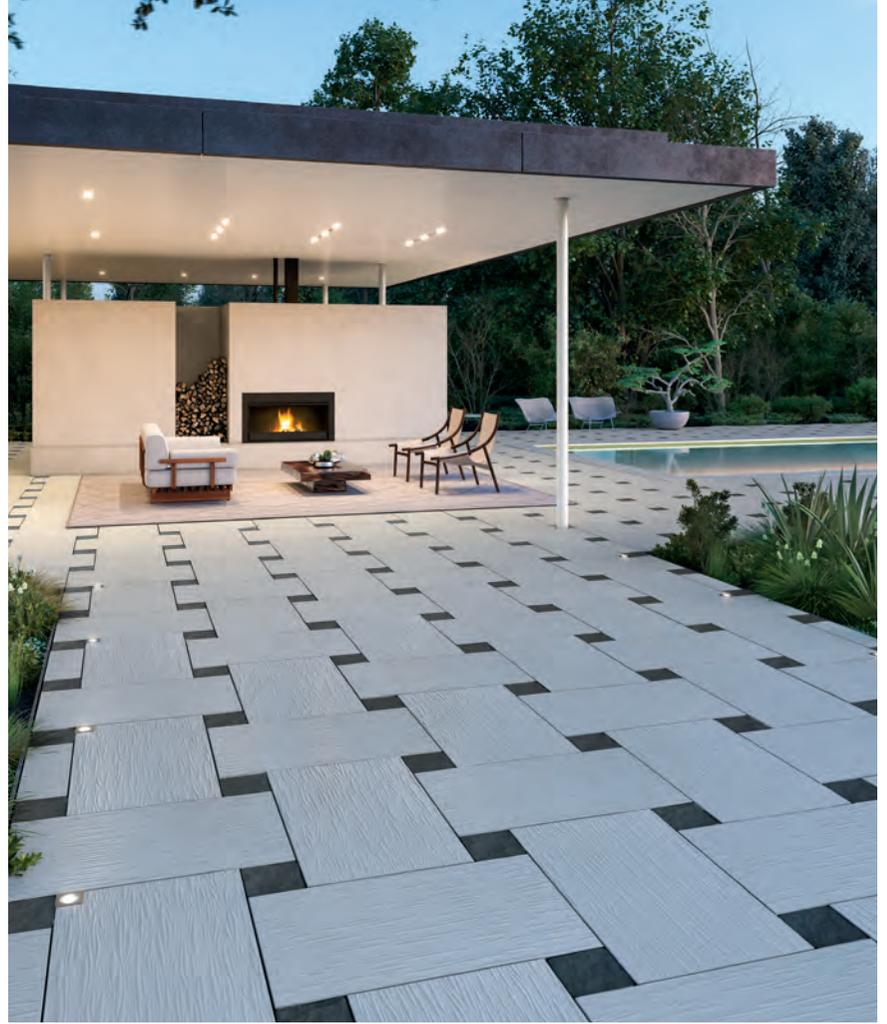

The spectacular woven effect created by smaller, rough-hewn Valet pavers amongst elegant Ocean slabs keeps the eye guessing and your guests swooning.

Square dance: The strikingly wood-like appearance of Borealis slabs fall perfectly into line when partnered with textured Travertina Raw slabs.

Texture is a brilliant way to add a subtle shakeup to your outdoor floor plan. Laying tone-on-tone but different-textured Diamond pavers in a seemingly random pattern looks at once casual and perfectly polished.

# Scale — Try this on for size

Whatever your stone style, spectacular comes in all shapes and sizes. And who says you have to choose? Bring them all into the picture for a mingling melange that never gets stale.

Tiny tiles are back in a big way. Intricately  
laid out square pavers trick the eye to  
create strikingly large scale impact.

Mix & match

Shapes and colors. Scales and proportions.  
Materials and finishes. This is where every element  
comes to play in a perfectly orchestrated game  
of style mastery.

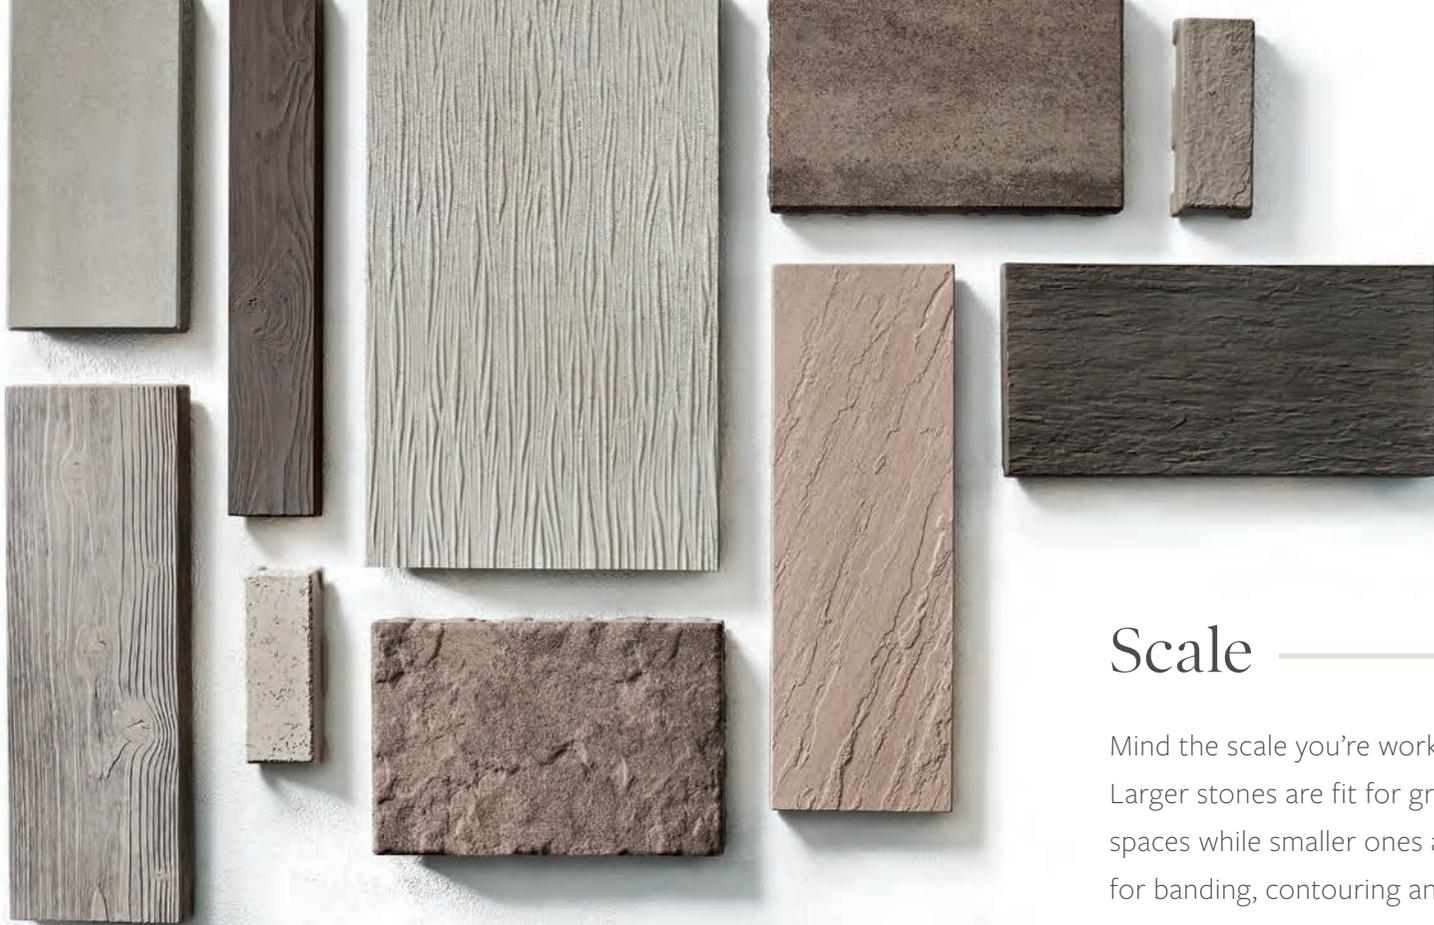

# Colors

We love naturals. Thoughtful planning of our color selection means that all your favorite shades show up in multiple collections, making it easy for you to mix, match and contrast to your heart's content. Refer to our color chart on p.158 to find which products are available in your favorite colors.

## Scale

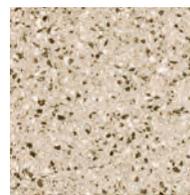

Mind the scale you're working with. Larger stones are fit for grand spaces while smaller ones are ideal for banding, contouring and mosaics.

## Textures

They may be concrete, but we prefer to call them trompe l'œil. These textures trick the eye with surface appearances that range from super smooth to ultra-detailed, and stay true even to the touch.
