## EXPAND YOUR HOME

A new outdoor living space can add functional square footage to your existing home by providing a new space to relax and entertain. Consider first how you would like to use the space, and then design it as an extension of your interior decorating style. Even a small space can appear bigger by using different paver colors, paver borders, elevation changes and seat walls to define distinct areas for cooking, eating and relaxing.

Unilock offers a software program that creates 3D visuals of your design. The software is called Uvision® 3D Landscape Creator and it's available to your contractor or designer.

## GET INSPIRED!

Fire features are growing in popularity because they add visual interest and warmth that makes the space more enjoyable to use in cooler weather. Lighting installed in gardens, low walls, steps and pillars will also help draw people outside in the evening and adds visual appeal that you can enjoy from inside your home. Snow-covered pillars and walls can make beautiful accents to your property in the winter months.

AWARDS  
OF EXCELLENCE  
BEST IN SHOW

This 1,200 square foot backyard makeover stemmed from an existing relationship. Bruss worked with the family several years prior on their front landscaping.

OF EXCELLENCE BEST IN SHOW.

The family already had a backyard that was a Unilock patio, with a firepit they used often, but they felt the existing space no longer fit the style and scale of the house and their growing family's needs. In addition to reworking the firepit, they also wanted a pool for their young daughters and an outdoor kitchen for entertaining.

The site presented a few design challenges. As a relatively flat site, drainage was a major consideration that required planning to balance the needs of meeting code for step heights while keeping the proper drainage away from the house and pool.

**The family was delighted with the outcome. The whole reason we do these projects is because we want people to use them.**

A flat site can lack dramatic elevation, so the team explored opportunities to make the space visually interesting. With so many elements, it was a challenge to balance everything and still create the "wow" factor.

Umbriano was selected for the patio/pool deck because of its refined surface and long-lasting color, and Rivercrest Wall for the pillars, firepit and grill island, to add vertical visual interest and natural textures. Town Hall and Copthorne, both in Basalt, were used for accents, to add depth to the color scheme.

The family was delighted with the outcome. "It was straight happiness," says Bruss Landscaping. "The whole reason we do these projects is we want people to use them. They have used the pool every single day since it was opened. I see posts on social media and that's the best, seeing them sharing it with friends, their children - that means we've done our job."

# Pool Decks

---

The beauty of a built-in swimming pool is trumped by the excitement of having it right in your own backyard! Here your imagination can run wild, with the addition of complementary pavers, slabs, borders, and vertical features to enhance and distinguish.

**Pavers:** Bristol Valley® (Steel Mountain) with Cophorne® (Basalt) and Brussels Block® (Sandstone) accents and Brussels Fullnose Coping (Sierra)

## SIZE MATTERS

When planning your pool deck, four feet is the minimum perimeter around the pool for basic access. However, if you intend to use the pool deck as a patio for entertaining or sunbathing, you'll need to increase this significantly. Be sure to keep in mind the size of your outdoor furniture; it's typically much bigger than indoor furniture!

Naturally, the deck surrounding a pool not only enhances its elegance, it's also important for safety reasons.

### **SAFETY CONSIDERATIONS**

The paver you choose for your pool deck deserves special consideration because you'll be walking on it in your bare feet! Be sure to choose a color that won't absorb too much heat from the summer sun. A smoother surface is pleasing to walk on, but make sure it's sufficiently non-slip. Umbriano® is our most popular choice for pool decks. For the coping around the edge of the pool, avoid products with abrasive edges. A contrasting coping color or inset border is also something to consider, as it helps define the pool edge.

# Driveways

---

There's nothing like the welcome you'll feel when you pull up to your Unilock driveway. A stunning paver driveway is an investment that adds instant curb appeal and value to your home. Your Unilock driveway will be strong, durable and designed to withstand heavy use throughout the year while looking beautiful for years to come!

## THINK GREEN 🌱

Permeable pavers allow rainwater to flow between the joints, through base materials and into the subsoil below. This reduces puddling on the driveway surface when it rains, and reduces ice build-up in winter. It also provides a dual “green” benefit; not only does it reduce the amount of water that flows into storm sewers but it also provides moisture to surrounding plant material.

# Entrances & Walkways

---

A great looking front entrance gives guests a warm welcome. Attractive steps that are wide enough to easily navigate, low garden walls and planter boxes, and smartly placed lighting all contribute to a cozy feeling that smooths the transition from the street to your home.
